# Results from the Beta Pictoris b Hill Sphere Transit Campaign

M. Kenworthy<sup>1</sup>, S. Mellon<sup>2</sup>, K. Zwintz<sup>3</sup>, T. Guillot<sup>4</sup>, J. Wang<sup>5</sup>, R. Stuik<sup>1</sup>, E. Mamajek<sup>2,6</sup>, E.J. De Mooij<sup>7</sup>, L. Abe<sup>4</sup>, D. Mékarnia<sup>4</sup>, P. Kalas<sup>5</sup>, I. Laginja<sup>8</sup>, S. Crawford<sup>8</sup>, K. Stevenson<sup>8</sup>, M. Ireland<sup>9</sup>, N. Suntzeff<sup>10</sup>, S. Lacour<sup>11</sup>, F. Kiefer<sup>11</sup>, A. Lecavelier des Etangs<sup>11</sup>, A. Vidal-Madjar<sup>11</sup>, Z. Hui<sup>12</sup>, L. Wang<sup>12</sup>, A. Lagrange<sup>13</sup>, M. Nowak<sup>13</sup>, P.A. Wilson<sup>14</sup>, B.B. Lomberg<sup>15</sup> and the BRITE Science Team

(1) Leiden Observatory, The Netherlands; (2) University of Rochester, USA; (3) Universität Innsbruck, Austria; (4) Université Côte d'Azur, France; (5) California Institute of Technology, USA; (6) Jet Propulsion Laboratory, USA; (7) Dublin City University, Ireland; (8) STScI, USA; (9) Australian National University, Australia; (10) Texas A&M University, USA; (11) LESIA, Paris Observatory, France; (12) Key Laboratory of Modern Astronomy and Astrophysics, China; (13) Institut de Planétologie et d'Astrophysique de Grenoble, France; (14) University of Warwick, UK; (15) University of Cape Town, South Africa

322.06 at ESS IV

International campaign with bRing (Kenworthy 2017, Stuik+ 2017), BRITE (Zwintz+ 2018), ASTEP (Abe+ 2013), AST3-II (Zhang Hui+ 2019), HST (PI: Wang and Kalas) with over 24,000 photometric observations.  
Spectroscopic monitoring covering Hill sphere transit (see de Mooij poster)
